

Outpatient clinics of public and private hospitals are reopening

The outpatient clinics of public and private hospitals are reopening on Monday, 27 April 2020, according to a decree issued by the Minister of Health, which has been published in the Official Gazette of the Republic on 23 April.

A provision according to which visits to private and public hospitals for non-urgent cases were banned, has been removed from the decree. Consequently, clinics/departments will be allowed to arrange appointments for cases that are not urgent.

It is also clarified that, according to the decree, planned surgeries are cancelled for patients whose health condition allows it and their lives are not in danger.
