

COVID-19 vaccination portal software upgraded

The Ministry of Health informs that the vaccination portal has been upgraded, in order to better serve citizens.

Following approval by the National Vaccination Committee, appointments for the Johnson & Johnson single-dose vaccine can be arranged two months after the first dose.

At the same time, from now on, a vaccination appointment can be arranged for the administration of a booster/3rd dose of an mRNA two-dose vaccine different from the one administered at the initial vaccination scheme, as regards Moderna or Pfizer/BioNTech vaccines or the booster/2nd dose in the case of the single-dose Johnson & Johnson vaccine.

In addition, as of Sunday 13 February at 11 p.m., the booster dose can be arranged five months after the completion of the initial vaccination, based on the decisions of the Council of Ministers dated 2 February.

It is also noted that in case someone misses their appointment for vaccination, that appointment is automatically cancelled, and a new appointment can be arranged.
