

**15,000 appointments to be made available for the vaccination of
individuals aged 57 and 58**

Only individuals aged 57 and 58 will have priority to arrange appointments for vaccination against COVID-19 on **Saturday, 10 April from 8 a.m. to 8 p.m.** For older individuals (aged 59 years and over), the Vaccination Portal will not be available at this stage. Specifically, 15,000 appointments will be made available at all Vaccination Centres across Cyprus.

The above change was made to ensure the continuation of the vaccination program of the population and because the vaccination portal's technical issues have not been overcome. It is noted that from now on and until technical issues are resolved by the Deputy Ministry of Research, Innovation and Digital Policy, appointments will **only be made available for new age groups**, which will be announced in advance.

The aim of the Ministry of Health is to restore the previous process as soon as possible, in order to enable older individuals, who have not yet arranged their vaccination, to do so.
