

**AstraZeneca vaccine can be administered to individuals aged 20 years and over by their Personal Doctors**

Beneficiaries aged 20 years and over, who wish to be vaccinated with the AstraZeneca vaccine, will be able to apply to their Personal Doctors. The option to be vaccinated in the Personal Doctors' clinics is **offered in addition to the option of scheduling an appointment through the Vaccination Portal.**

So far, 254 Personal Doctors covering all Districts participate in the vaccination process. According to the available data, 23,080 doses of the vaccine have been requested by Personal Doctors, based on requests submitted by doctors, and 7,000 of these doses have already been administered.

It is noted that the process of expression of interest by Personal Doctors for participation in the vaccination process is still open and those who wish to participate can register through the Health Insurance Organization.
