

**Postponement of vaccinations with the AstraZeneca vaccine
until 18 March**

Pending the opinion of the European Medicines Agency's Pharmacovigilance Risk Assessment Committee (PRAC), which is investigating a number of cases of blood clots in people who had received the AstraZeneca vaccine in EU member states, it was decided on 15/3/2021 to temporarily postpone vaccinations in Cyprus with the AstraZeneca vaccine until Thursday, 18 March.

It is clarified that the scheduled vaccination appointments with Moderna and Pfizer/BioNTech vaccines will be carried out normally.
