

Administration of a booster dose for individuals aged 40 years and over, begins

The procedure for the administration of a booster dose for individuals aged 40 years and over, begins as of 17 November, provided that **a period of six months has elapsed since the completion of their vaccination scheme** (namely the administration of a second dose in the case of Pfizer/BioNTech, Moderna and AstraZeneca vaccines or Johnson & Johnson's single-dose vaccine).

The beneficiaries will be able to be served as of tomorrow at the walk-in vaccination centres operating in all Districts, from Monday to Thursday, from 8 am to 1 pm. Alternatively, individuals aged 40 and over will be able to arrange an appointment via the Vaccination Portal as of tomorrow.

It is recalled that people who received the Pfizer/BioNTech and Moderna vaccines during the initial vaccination, will receive the same vaccine for the booster dose. People who were initially vaccinated with the AstraZeneca vaccine will be able to choose an mRNA vaccine (Pfizer/BioNTech or Moderna). Finally, people who received the Johnson & Johnson's single-dose vaccine will be able to be vaccinated with either an mRNA vaccine or a Johnson & Johnson one.

All individuals must provide proof of identification (identity, passport, Alien Registration Card, etc.) as well as their Vaccination Card.
