

Operation of rapid antigen testing units in remote areas

In view of today's final decision of the Council of Ministers for the re-opening of Gymnasiums, with the physical presence of students on Friday, 2nd April, it is reminded that students will have to undergo a rapid antigen test before returning to their schools. The students can undergo a rapid test offered free of charge through the program by the Ministry of Health, or at an approved private clinical laboratory at their own expense.

For the convenience of residents of remote areas and communities outside urban centres, the Ministry of Health has planned the operation of testing units during the following days, in the communities listed below:
